Feedback Report

HexaHome Website

Things I liked

- Gives lots of information about each property like price, type, location, size etc.
- It makes easy to contact with owner, that cutsoff the middle man or broker which is great.
- Reviews show users are happy with it.

Could be better

- Filters for property search are not clear enough.
- Too much repeat info in listing that could be shorter.
- Download process is slow.
- Search results take more time to load.
- When applying multiple filters (like 2BHK, 3BHK, 4BHK with location), updates take longer to show.

Suggestion

- Make filter easy to spot and use.
- Can highlight important section more clear.
- Optimize download speed and search performance.
- Improve response time when multiple filters are applied together.

Hexadecimal Software Website

Things I liked

- Service details are short and clear.
- Good explanation of how they work with clients.

Could be better

- Pages have lots of text, and services on first page that might be hard to read or scan.
- Contact buttons could stand out more.

Suggestion

- Can add quick contact buttons everywhere.

HexaHome Blog

Things I liked

- Useful articles for local property advice.
- Categories and tags help in quickly finding relevant content.

Could be better

- Hard to find old content or search content.
- Some titles lack of clarity while representing.

Suggestion

- Add search and sort section for blogs.

Hexadecimal Blog

Things I liked

- Covers lots of tech topics with tips for professionals.
- Easy to read the relevant topic.

Could be better

- Posts are text heavy this could be summaries.

Suggestion

- Add short summaries or highlights for better readability.
